

# HMIS Release Notes

## PATH BNL Crosswalk Report

March 28, 2022

### What are the changes?

A new view has been added to HMIS to allow for reporting on PATH client data. The view will provide a list of clients who are enrolled in PATH programs and their current status on the By Name List (BNL).

### Which users are impacted?

#### PATH Outreach

### How does this help?

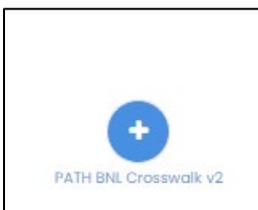

This view will allow for users to review information on clients who are enrolled in a PATH program to confirm that their status is correctly reflected on the BNL to avoid people being left out of the housing matching process.

### When will I see this change in HMIS?

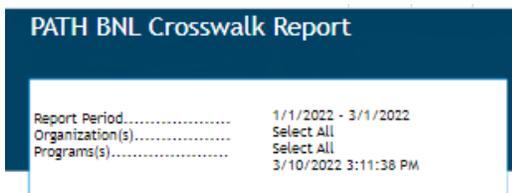

**This change is expected to be rolled out on Monday 3/28/22.**

### Screenshots of Changes

Location: Administration > Reporting > Compliance Reports > PATH / Outreach > PATH BNL Crosswalk Report v2

#### Report output

Organization	ClientID	Program Name	Enrollment Begin Date	Enrollment End Date	BNL Status	BNL Sub-status
--------------	----------	--------------	-----------------------	---------------------	------------	----------------

### **Additional information**

BNL Status indicates whether a client is “Active” and being considered for housing options at CAN matching meetings. “Inactive” clients are not being considered for housing options.

BNL Sub-status provides additional information about a client’s housing situation or status with regard to CAN services.

A “Housed” sub-status indicates that a client is permanently housed.

Clients who had an enrollment open, closed, or existing during the date parameters entered will display in the output based on the client’s most recent PATH enrollment.
