

## UAT Notes – Version 8.0.18: Part II

### Part 1: Resolved Issues

Issue ID Azure/Support	Issue Description
2387 / 27196	An error no longer appears when trying to access the My Profile Dashboard in the Portal.
3138	An error no longer appears when trying to edit a specific provider.
3513	The 'Reset Password' dialogue box appears correctly on mobile devices, and does not cut off the 'Submit' button.
3529	The 'Display local time' form element property converts time to the current user's computer time zone. However, if 'Display local time' and 'Display current time' are both being used by the form, the TimeZoneDefault application setting is used.
3870	When a time is defaulted to '00:00:00', it displays correctly instead of 'NaNNa'.

### Part 2: Updated Forms, Dashboards, and Workflows

Navigation paths in the **All Features role** have been added for these issues.
