

Maintenance Release – Version 8.0.43

Part 1: All Features

New Functionality & Enhancements

Feature/Enhancement	Description
User Interface – apBuilder Tools	CaseWorthy's apBuilder toolset's User Interface has been updated to improve User experience.
New Dashboard Widget – Document Download	A new dashboard widget can be added to any dashboard through the Dashboard apBuilder that allows the User to view and download documents.

Resolved Issues

Issue ID Azure/Support	Issue Description
6086 / 31188	Resource Usage recurring events will now appear correctly on calendars.
7583 / 33550	Emails that are sent by the database to Users to update passwords will no longer include a space after the auto-generated password and the word 'visit' will appear correctly.
8009	In CommHUB, the User will no longer receive notifications for the Chat in which they are currently active.
8188	The new dashboard widget Client Data now renders dates correctly.
8415 / 31433	The role apBuilder saves updates as expected.

Updated Forms, Dashboards, and Workflows

Navigation paths in the **All Features** role have been added for these issues.

Issue ID Azure/Support	Form IDs – Display Name	Issue Description
8172 / 33502	890 – Service Request Approvals 13246 – Document Checklist	Forms now display for checklist links for Service request approvals. <i>Organization tab: Approvals > Service Requests > Approvals > VIEW CHECKLIST</i> <i>Administration tab: Setup > Programs and Accounts > Approval Processes > Approval Process action gear – Process steps > Step action gear – Checklist</i>
8175 / 33831	8221 – Individual Service Plan Summary	The summary form now correctly displays the number of goals rather than just a zero. <i>Case Management tab: Case Management > Program Enrollment > Individual Service plans</i>
8322 / 33979	13111 – Daily Census	The Daily Census now displays correctly. <i>Case Management tab: Calendars > Staffed Housing > event’s action gear – Daily Census</i>
